

Complete service provision

Altrimex Packaging Solutions offers customised packaging installations for piece goods and hardware, powders, liquids and tablets. Innovative and efficient solutions that get optimum returns from your packaging lines.

Altrimex tackles your packaging problem thoroughly and expertly. From advice, engineering, project supervision, delivery and installation to training your operators and optimising your lines. Of course, if required, you can also use our helpdesk facilities, breakdown service and our central spare parts warehouse.

- Easy to expand into a fully automatic system

From product infeed to palletising: We have the total solution in house

Since its foundation in 1973, Altrimex has specialised in complete packaging solutions for the hardware industry. And the evidence is unmistakable.

The individual machines are very robust, practically maintenance-free and easy to set. Our packaging systems are characterised by their modular structure, making later expansion possible at any time. Only high-quality European components are used, which are specially designed for the handling of hardware and comply with all certifications.

Because we have various options for feeding, weighing, counting and (total) packaging of your products, we can give you the best advice that will suit your requirements.

An always thorough and honest advice for you as a customer, that is our priority.

Altrimex takes total responsibility for the realisation of your packaging system and guides the entire process from order to completion with a thorough turnkey approach, so that everything is taken care of from A to Z, without any worries.

And should you want to make use of our assistance at a later time, we are of course always available for you with our own after-sales service.

Investing in an Altrimex packaging system is therefore always a responsible investment for the future.
